INTERPRETATION (RESULT):

POSITIVE - TUMOR CELLS ARE PRESENT.

DESCRIPTIVE DIAGNOSIS:

Tumor cells present consistent with non-small cell carcinoma. See comment.

COMMENTS:

Some morphologic features suggest neuroendocrine differentiation. The differential diagnosis includes large cell undifferentiated carcinoma and large cell neuroendocrine carcinoma. Do not favor variant of small cell carcinoma. If additional tumor tissue is obtained, immunostains for neuroendocrine markers may be helpful in determining the presence or absence of neuroendocrine differentiation.

"I have personally reviewed the accompanying paperwork, gross description, and specimen preparation(s) referenced herein, and have personally issued this report."
